OUR SPECIALITY

Having designed and installed numerous Solar PV systems since 2010, we at RenewEco are experienced and reliable system cleaners.

Our cleaning and maintenance service is quick and easy causing no disruption to your daily routine.

WHY CLEANING SOLAR PV PANELS?

One of the reasons for this is DIRT. As soon as your panels are out in the open air dust, droppings and airborne particles will settle on them, thereby blocking sunlight, reducing their efficiency and costing you money.

It is reasonable to assume solar panels can lose 15-25% of their efficiency if not cleaned properly. This means they will generate 15-25% less electricity, causing you to source it from the utility companies at full tariff rates.

This will easily add years to your payback time.

SERVICES

We offer residents and commercial property owners who are committed to maximise their payback period a comprehensive cleaning service like no other.

RESIDENTIAL PANEL WASHING

For systems less than 10kW
Single Storey: \$195.00* + GST
Double Storey: \$240.00* + GST

Full system cleaning and health check. Includes cleaning, inspections, testing and reporting.
\$490.00* + GST

COMMERCIAL PANEL WASHING & FULL SYSTEM HEALTH CHECK

For systems over 10kW
POA

*Pricing guide only - Fixed quotation provided upon request

SYSTEM PERFORMANCE

Your system's performance may be reduced by the build up of:

- Dirt
- Pollution
- Ash from fireplaces
- Leaves from overhanging trees
- Faeces - bats, birds, possums etc
- Salt residue build up especially on the lower corners of the panel.

WE ALSO OFFER

- System Health Check
- Remote Display and Monitoring
- New Installations
- Meter Upgrade
- Battery Upgrade and Installation
- Additional Panels
- Complete Upgrade of your System
